

TUF-STEEL[®]

A FULL LINE OF
WORLD CHAMPION
GASKETS

Rubber Fab

a Garlock Hygienic Technologies company

TUF-STEEL® IS THE TRUE CHAMPION BECAUSE TUF-STEEL® GOES THE DISTANCE.

Composed of a unique proprietary blend of non-pigmented PTFE and 316L passivated and atomized Stainless Steel, you can bet on any Tuf-Steel® seal for leak-proof performance and outstanding durability. There is no beating the Tuf-Steel® family in SIP, WFI and hot oil applications because Tuf-Steel® maintains seal integrity in applications with large temperature variations. With a **500 steam cycle guarantee**, this metal detectable gasket will easily out perform any elastomeric or perfluoroelastomer gasket and will remain in service for extended periods of time. It is the material of choice when chemical and heat resistance are required. Minimum creep and cold flow, non-stick, ultra-low absorption, no pigmentation and Tuf-Steel® will not revert. **This gasket is tough!**

Rubber Fab

a Garlock Hygienic Technologies company

TUF-STEEL® IS NOT JUST ANOTHER PRODUCT LINE

**It's the future of the
processing industry**

Testing and a decade of documented application usage has demonstrated that Tuf-Steel® is the choice for perfect surface performance, outstanding durability and extended service life. Tuf-Steel® is ideal for sanitary steam pipe connections in extreme temperature applications, such as frier and hot oil applications, with temperatures ranging from -350°F up to 550°F. The superior strength of Tuf-Steel® eliminates creep and cold flow providing a leak-free seal. Tuf-Steel® is available in: Type I Standard TC Gasket, Mini TC Gasket, Type II Flanged, Type III Envelope Style, Sanitary O-rings, Sanitary TC Screen Gasket, Sanitary TC Orifice Plate Gasket, Steam Trap Orifice Plate Gasket, Sheet, Solid Rod, Ansi Flange, and Custom Gaskets.

TUF-STEEL®

THE TECHNOLOGY OF TOUGH

A POWERFUL COMBINATION OF INNOVATION AND VALUE THAT PUNISH THE COMPETITION

The original Tuf-Steel® gasket, a Rubber Fab product innovation, is the strongest gasket in the pharmaceutical, biotech, food and beverage industries. Whatever your application, there's a gasket in the Tuf-Steel® family ready to do the job.

Tuf-Steel® is ideal for extreme temperature applications, such as steam, hot oil and friers, where temperatures range from -350°F to 550°F. Unlike traditional solid PTFE and PTFE envelope style gaskets, Tuf-Steel® does not revert, eliminating creep and cold flow, resulting in a leak free seal. Because the superior strength and chemical resistance of Tuf-Steel® allows it to go the distance without

leaking, it significantly reduces maintenance and system downtime by staying in place when cleaning and validating a system.

Testing and a decade of documented application usage has demonstrated that Tuf-Steel® is the choice for perfect surface performance, outstanding durability and extended service life in both SIP (steam in place) and WFI (water for injection) applications.

TUF-STEEL® Stands Up to Rigorous Conditions and Delivers Leak-Proof Performance

- 500 CIP/SIP cycles guaranteed
- Excellent expansion/contraction stability with minimal thermal expansion
- Excellent chemical resistance
- Stops leaks when correctly torqued (50 in./lbs. with Torque-Rite Model TR-50)
- Tuf-Steel® is a compression control gasket
- No gasket intrusion into the sanitary tube I.D.
- No obstruction of flow
- Maintains sealing stability in ΔT processes

PTFE and Stainless Steel TUF-STEEL® Offers Rugged Composition for Demanding Challenges

- Proprietary PTFE and Stainless Steel blend
- Metal detectable
- Rouging eliminated
- Non-pigmented
- Non-stick surfaces
- I.D. Pharmaceutical finish

* Add -TAB to end of part number for Tabbed Orifice Plate

Rubber Fab's innovative Tuf-Steel® Orifice Plate line includes a complete selection of Tuf-Steel® /316 Stainless Steel Orifice Plate gaskets in standard or tabbed style that can be custom drilled with an eccentric or concentric bore. Orifice Plate Tabs help to acknowledge that an orifice plate is "in line" and can be laser engraved to indicate the hole diameter, gasket size or user specified information. Orifice plates can advance your system's performance, adjust flow rates, balance backflow and equalize back pressure during SIP procedures.

AVAILABLE SIZES: 1/2" – 6"

LASER ENGRAVED GASKETS

Laser engraved gaskets insure process line identification and provide complete lot and batch traceability!

AVAILABLE SIZES: 1/2" – 4"

TUF-STEEL® TRI-CLAMP® SCREEN GASKETS

UNLIMITED POSSIBILITIES... TUF-STEEL® CUSTOM FABRICATION

When your application demands products that stand up to extreme temperature conditions ranging from -350°F up to 550°F, look to Tuf-Steel®. Tuf-Steel® is ideal for sanitary steam pipe connections and anywhere outstanding durability and extended service life are required. Tuf-Steel® can be fabricated, machined, lathed or waterjet cut.

Contact Rubber Fab's Technical Sales Team at 973-579-2959 for all of your application requirements and the unlimited possibilities of Tuf-Steel®.

TUF-STEEL® SHEET MATERIAL

Tuf-Steel® sheeting material can be waterjet cut into custom patterns.

AVAILABLE SHEET SIZE:
36" X 36"

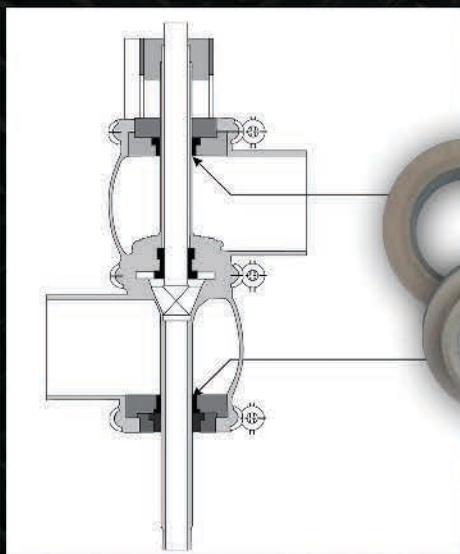

AVAILABLE THICKNESS:
1/16" & 1/8"
Consult Factory for other sizes.

TUF-STEEL® SOLID ROD

Rubber Fab's Tuf-Steel® Solid Rod can be machined into custom parts.

AVAILABLE ROD DIAMETER:
1/8" – 2"

TESTED AND PASSED....

TUF-STEEL® CAN BE USED IN CRYOGENIC APPLICATIONS

When extreme temperature conditions are required, Tuf-Steel® can stand up to the challenge. Rubber Fab had Tuf-Steel® tested for cryogenic applications and as you can see, Tuf-Steel® performed just fine!
